Technical Training & Customer Success Professional | AWS Cloud Learner | Educator & Coach

PROFESSIONAL SUMMARY

Customer-focused training and education professional with 4+ years of experience delivering instruction, facilitating technology adoption, and managing stakeholder relationships across diverse environments. Proven ability to translate complex concepts into actionable solutions, drive user engagement, and support successful program implementation.

Experienced in training, coaching, customer support, and cross-functional collaboration with a strong foundation in cloud computing concepts through completion of AWS Solutions Architect training. Seeking opportunities in Technical Account Management, Customer Success, Technical Training, Implementation, and cloud-focused customer-facing roles.

PROFESSIONAL EXPERIENCE

Assistant Flag Football Coach | Suitland High School, District Heights, MD *Sep 2025 – Present*

- Designed and delivered structured training programs to support skill development, performance improvement, and team engagement.
- Analyzed performance metrics and provided individualized coaching plans to drive measurable improvement.
- Collaborated with athletes, parents, administrators, and coaching staff to achieve program objectives.
- Communicated complex strategies and concepts in an accessible manner to diverse audiences.
- Fostered accountability, teamwork, and continuous improvement through data-informed coaching practices.

Physical Education Teacher | Prince George's County Public Schools, District Heights, MD *Sep 2021 – Present*

- Delivered training and instructional programs to 150+ students annually, adapting content and communication styles to meet diverse user needs.
- Facilitated technology training sessions for faculty and staff, improving adoption and utilization of digital learning platforms.
- Implemented and supported technology solutions including Google Workspace, Microsoft Teams, Google Classroom, and LMS platforms to enhance collaboration and engagement.
- Utilized performance data and assessment metrics to identify trends, optimize outcomes, and support continuous improvement initiatives.
- Partnered with administrators, educators, and stakeholders to implement district initiatives and improve program effectiveness.
- Managed multiple concurrent projects, priorities, and stakeholder expectations in a fast-paced environment.
- Delivered presentations and facilitated group training sessions for students, staff, and educational stakeholders.

Mentor Volunteer | Higher Achievement, Greenbelt, MD *Oct 2019 – Present*

- Provide academic tutoring and mentorship to middle school students preparing for high school placement.
- Guide mentees through personal and academic challenges, building confidence, study skills, and high school readiness.

Physical Therapy Aide | Anne Arundel Medical Group, Upper Marlboro, MD *Dec 2020 – Aug 2022*

- Supported healthcare professionals through patient-facing service, documentation, scheduling, and operational support.
- Built strong client relationships while assisting with treatment plans and service delivery.
- Maintained accurate digital records and ensured compliance with organizational procedures.
- Communicated technical instructions and treatment protocols clearly to diverse patient populations.

Operations Associate | GoPuff, College Park, MD *Jun 2018 – Feb 2021*

- Delivered customer support in a high-volume operational environment while maintaining service quality standards.
- Resolved customer inquiries and operational issues through effective problem-solving and communication.
- Managed inventory audits and operational processes to support business objectives and performance targets.

TECHNICAL PROJECTS

AWS Cloud Learning Projects

AWS Solutions Architect Training

- Completed comprehensive AWS Solutions Architect training covering core cloud architecture principles, networking, security, storage, compute, and database services.

Cloud Infrastructure Labs

- Built and configured AWS cloud environments utilizing IAM, EC2, S3, VPC, Route 53, and security best practices.
- Applied cloud architecture concepts including networking, access control, high availability, and scalability.
- Documented implementation processes and technical concepts to reinforce learning and knowledge sharing.
